EDUCATION

- **Indira Gandhi Delhi Technical University for Women** Delhi, India
 - *Bachelor of Technology in Electronics and Communication Engineering; CGPA: 9.18* Aug 2021 – May 2025
 - **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering

SKILLS SUMMARY

- **Languages:** C++, Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3
- **Frontend Frameworks:** React.js, React Native, Redux Toolkit, Context API, Tailwind CSS, Material UI
- **Backend Technologies:** Node.js, Spring Boot, Hibernate, RESTful APIs, Microservices
- **Databases:** PostgreSQL (pgvector), MongoDB, MySQL
- **Cloud & DevOps:** GCP (Compute Engine, VM Autoscaling, Cloud Monitoring), Docker, Linux, Git, GitHub Actions
- **AI / ML:** LangChain, LLM Orchestration, AST-aware Embeddings, Semantic Search, AI Agents
- **Core CS Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

EXPERIENCE

- **Software Engineer** Noida
 - *Ultimate Kronos Group* Aug 2025 – Present
 - **Infrastructure & Cost Efficiency:** Reduced **GCP** costs by **20–25%** via VM right-sizing, autoscaling, and committed-use discounts; built **Linux-based automation** for VM lifecycle management on **Compute Engine**.
 - **Smart CI/CD Test Selection:** Built a **code-aware test selection system** that executes only **semantically impacted tests**, reducing CI latency while preserving correctness via an **LLM-orchestrated decision layer** using **LangChain** and **Claude 3.5 Sonnet**.
 - **AST & Embedding-Based Analysis:** Indexed test files as **AST-aware embeddings** and matched them with code diffs via **semantic similarity** to identify impacted tests across large-scale codebases.
 - **Vector Search & Infrastructure:** Stored embeddings in **PostgreSQL with pgvector** and ran **cosine similarity** searches; added confidence-based fallback for production safety.
 - **Code Review & Documentation:** Conducted code reviews for the test selection system, enforcing best practices on testability and accuracy; contributed to internal technical documentation for onboarding.
- **Software Developer Intern** Gurugram
 - *OYO ROOMS* Jan 2025 – July 2025
 - **Frontend Ownership:** Developed a scalable Lead Management System for G6 brand using **React Native and Redux Toolkit**, reducing code duplication by **40%** in UI layer.
 - **Widget-Driven Listing UI:** Built a generic listing page where backend configuration controlled headers, filters, tables, and pagination, enabling rapid feature updates without frontend redeloys.
 - **Performance Optimization:** Implemented **lazy loading**, code splitting, and paginated data fetch, cutting initial load times by **35%** and improving responsiveness.
 - **State & API Management:** Managed global state using **Redux Toolkit** and handled API calls via custom middleware for consistent and predictable data flow.

PROJECTS

- **Cloud Infrastructure Monitoring System (Python, System Design, GCP, Full-Stack Development):** Architected **end-to-end monitoring solution** with automated data collection, analysis, and reporting capabilities. Developed **custom GitHub Actions** for reusable workflow components across multiple environments. Implemented **comprehensive logging and debugging system** for rapid issue triage and resolution. Built **automated email delivery system** with operational reporting.
- **Modern Expense Tracker (React.js, Node.js, Express.js, MongoDB, Chart.js):** Developed a full-stack financial management platform enabling users to track income, categorize transactions, and manage **recurring expenses**. Implemented **dynamic category selection with drag-and-drop reordering**. Designed **interactive dashboards** (line, bar, pie charts) for category-wise insights.

ACADEMIC ACHIEVEMENTS & AWARDS

- **Research Publication:** Co-authored “Blockchain-Driven Cybersecurity and Efficiency Enhancement in SCADA-Based Power Grids”, accepted at the **2025 IEEE MP Section International Conference** — systems security research on critical infrastructure.
- **Google Developer Student Club (GDSC) Lead:** Led the GDSC chapter at IGDTUW, organizing technical workshops, hackathons, and developer community initiatives within the Google ecosystem.
- **Google Girl Hackathon Finalist:** Ranked in the top 100 out of 200K+ participants nationwide, demonstrating advanced algorithmic problem-solving.
- **Myntra HackerRamp: WeForShe 2024:** Qualified in the top 10 teams for an industry-level hackathon focused on scalable e-commerce solutions.
- **OnePlus Open Ears Forum 2024:** Selected among 30 participants across India to contribute product feedback and technology insights.
- **Leadership:** Vice President at Rotaract Club, organizing community-driven initiatives and social impact programs.
